June 2019 – Sep. 2019

*Bingemans*

*Kitchener, ON*

- Maintained proficiency in First Aid and CPR to offer optimal support to individuals in distress
- Adhered to safety procedures by generating accident and incident reports

## PROJECTS

---

### GryphHack's Website | *React, NextJS, HTML, SCSS, NodeJS, MongoDB, RestAPI*

Dec. 2022 – Present

- Designing and developing the Full Stack website being used at the GryphHacks Hackathon event in May 2023
- Working in a team environment of 15 developers using GitHub projects and issues to delegate tasks
- Adopted the agile development methodology, scheduling weekly meetings and splitting tasks into 2 week sprints

### Website Portfolio | *React, HTML, CSS*

Sep. 2022 – Jan. 2023

- Developed a website portfolio to showcase my skills and projects
- Designed the frontend using React, HTML and CSS
- Maintained a responsive design throughout the website to preserve seamless functionality on different display sizes

### Workout Tracker (Frontend Redesign) | *React, HTML, CSS*

Sep. 2022 – Oct. 2022

- Redesigned the frontend of the Workout Tracker application creating a more intuitive user interface
- Developed the application using React, HTML and CSS
- Semantic HTML and SCSS were utilized throughout the codebase to ensure easy readability and ability to create a responsive design

### Workout Tracker Website | *React, HTML, CSS, ExpressJS, NodeJS, MongoDB, RestAPI*

June 2022 – Sep. 2022

- Designed a Full Stack Website used to track your workouts (exercises, sets, reps, etc)
- Created the backend REST API using Node.js, MongoDB and Express
- Developed the frontend website using React, HTML, CSS and Redux/Redux Toolkit

### Chat Application | *HTML, CSS, ExpressJS, Socket.io, NodeJS*

May 2022 – May 2022

- Constructed a chat website with the ability to message users across different domains
- Created the backend using Node.js and Express
- Used the Socket.io library for communication between the web client and the server

## TECHNICAL SKILLS

---

**Languages:** JavaScript, Java, C, HTML, CSS, MongoDB (noSQL)

**Frameworks:** React, NextJS, Node.js, ExpressJS, Material-UI, Socket.io

**Developer Tools:** Git, Postman, npm, Linux, Windows, VS Code
